

**NEW!**

## **Excel-RAVEN Tutorials on Pivot Tables**

Do you run out of time and patience working with large chunks of data in Excel? Excel Pivot Tables could help you manage your data more easily. In less than 15 minutes, one of the new Excel-RAVEN tutorials can put you on your way to creating, modifying and using Pivot Tables.

The two newest tutorials – **Pivot Tables in Excel 2003** and **Pivot Tables in Excel 2007** – are available online now at <http://www.umaryland.edu/eumb/training/excel-raven.html> . They contain both video and audio so be sure to adjust your speakers!

The Pivot Table tutorials top off the series begun with our first three Excel-RAVEN tutorials: **RAVEN and Excel Basics**, **Preparing Your Report** and **Data Analysis & Collaboration**. Choose to view any tutorial in its entirety or use the Table of Contents to jump directly to the topic you need.

As always, we welcome your feedback. Contact Robin Reid ([rreid@umaryland.edu](mailto:rreid@umaryland.edu)) to share feedback on your experience with the tutorials or your ideas for future topics.
