

Internet Explorer Version 8 and UMB Administrative Systems

July 2009

At this point in time, CITS does not recommend installing Internet Explorer (IE) Version 8 on your desktop.

There are numerous UMB enterprise application systems that are not certified by our vendors for use with this version of IE.

We will post another message when you are able to run UMB enterprise applications with Internet Explorer Version 8.

For specific information on uninstalling IE Version 8, please refer to Microsoft's instructions at <http://support.microsoft.com/kb/957700> .
