The distinguished history of the Baltimore College of Dental Surgery is filled with prominent names in the dental profession, most notably

Drs. Horace H. Hayden and Chapin A. Harris.

Both men led the effort to establish formal dental education in the United States. The University of Maryland was the first institution in history to offer a course in dental education, creating a prototype for dental schools in other American cities.

Founded in 1840, the Baltimore College of Dental Surgery merged with the Dental Department of the Baltimore Medical College in 1923. Over the past 166 years, the Dental School has maintained its position of leadership in dental education and oral health care. The School offers comprehensive and innovative professional and graduate programs: baccalaureate and master's degrees in dental hygiene; the doctor of dental surgery degree; advanced specialty education in seven disciplines, including an oral-maxillofacial surgery and MD program; two advanced general dentistry programs; and professional development courses.

The Dental School's state-of-the-art, digital facility, makes it the first school in the U.S. equipped with modern, innovative technology.

Based on research funding, the Dental School is ranked number four among U.S. dental schools by the National Institutes of Health.

Did you know?

The Dental School is Maryland's predominant provider of comprehensive and emergency oral health services for individuals of all ages. Each year, the School serves nearly 35,000 people through more than 122,000 patient visits.

Graduate studies began at the Baltimore campus of the University of Maryland in 1917. Today, the Graduate School in partnership with UMB's professional schools of dentistry, medicine, nursing, pharmacy, and social work offers 27 Master of Science (MS) and Doctor of Philosophy (PhD) degree programs in health, biomedical, social and population sciences.

All doctoral students are actively engaged in research with faculty members to address some of society's most pressing problems and biomedical research's most challenging questions in basic and translational research. These efforts, supported by over \$411 million in research grants and contracts in Fiscal Year 2007, are undertaken collaboratively with the National Institutes of Health, the National Science Foundation, the University of Maryland Medical Center, the Veterans Affairs Medical Center, the University of Maryland Biotechnology Institute, and others.

The Graduate School offers joint degrees with the University's professional schools including MD/PhD, PharmD/PhD and DDS/PhD degree programs. It also coordinates interinstitutional studies in biochemistry, gerontology, toxicology and other University System of Maryland graduate programs.

School of Law

For nearly two centuries, the School of Law has educated leaders of the practicing bar and bench and many leaders of the business and political communities.

The physical building and its surroundings provide a superb venue for instruction and learning. The School of Law's interior courtyard, with its waterfall fountain, provides an area of tranquility and respite for the School of Law community. The Ceremonial Courtroom has provided a venue for a number of courts including the Court of Special Appeals of Maryland and the United States Court of Appeals for the Fourth Circuit.

The School's emphasis on "real world" programs includes a strong commitment to interdisciplinary education and scholarship. A multitude of dual-degree opportunities and experience-based learning also encourage exploration of the intersection of theory and practice. Programs in Law and Health Care and in Environmental Law reach across professional boundaries and offer students the opportunity to specialize in cutting-edge areas of legal practice. Emerging programs in International Law and in Business and Intellectual Property feature both traditional classroom instruction and supervised externships and field placements.

In recent decades, the greatest change in legal education has been the advent of clinical education, where law students--under faculty supervision-- represent clients in actual cases in much the same way that medical residents

and interns are educated. The School has been continually recognized as having one of the very best clinical programs in the country. Clinical students and faculty members represent groups as diverse as AIDS patients, local governmental units in environmental compliance matters, and emerging entrepreneurs in the biotechnology area.

Also see Thurgood Marshall Law Library under Libraries in the Services and Resources section.

Did you know?

The School of Law has one of the best student/faculty ratios in the country. Its Health Law, Clinical Law, and Environmental Law programs ranked in the top 10 in the country in U.S. News & World Report. The School of Law placed among the top 21 of all public law schools in the nation ranked in the survey released in 2008.

School of Medicine

The foundation was laid for the School of Medicine in 1789 when three Baltimore physicians organized themselves into the Medical Society of Baltimore. They began lecturing on anatomy, surgery, and chemistry in a backyard garage in an effort to train young physicians, whose numbers had greatly diminished after the Revolutionary War. Soon the three doctors petitioned the state legislature to establish a college of medicine under the protection of the law. The request was approved December 18, 1807, as was a lottery to raise money for the fledgling College of Medicine. In 1810, the first degrees of Doctor of Medicine were awarded to 5 men.

Determined that the School have its own facility, Baltimore physician John Beale Davidge and two friends, John Shaw and James Cocke, purchased a parcel of land from Baltimore landowner John Eager Howard. The current site was chosen after buildings previously occupied by the School were destroyed. Davidge Hall, the first building of what was to become the University System of Maryland, was built in 1812 and the College became the University of Maryland School of Medicine in 1813.

Today, Davidge Hall remains the most tangible evidence of the way medicine was taught in the early 19th century. In 1823, the Baltimore Infirmary was built on the corner of Lombard and Greene streets. It was the first hospital founded by a medical school for the purpose of clinical instruction. The School of Medicine was the first in the nation to open its hospital wards for bedside teaching, a major advance in medical education. The hospital also was the site of the first intramural

residency training program in the United States. Senior medical students lived in the hospital while helping to care for patients.

Today, the School of Medicine is a hub of biomedical research activity. The School is in the top 10 percent of public medical schools in National Institutes of Health research funding and has been ranked in the top 25 percent of the nation's medical schools for program quality.

Founded in 1889, the School of Nursing is one of the leading research institutions in the nation. Currently ranked among the top seven schools in the nation by U.S. News and World Report, the School enrolls approximately 1,400 students in its baccalaureate, master's, doctoral and continuing education programs. The School emphasizes the integration of research, teaching and clinical practice, and serves regional, national, and international audiences.

The School has pioneered a variety of innovative educational programs, including the world's first Nursing Informatics program and Maryland's first Doctor of Nursing Practice (DNP) program.

A variety of flexible and combined programs are offered to accelerate degree completion. These include the RN to MS program, the Clinical Nurse Leader master's program, postbaccalaureate entry option into the PhD program, and the MS/MBA and MBA/PhD programs offered in cooperation with the Robert G. Merrick School of Business at the University of Baltimore, the School of Business at Frostburg State University, and the Robert H. Smith School of Business at the University of Maryland, College Park.

The School has expanded access to nursing education by extending its programs to several outreach sites within the state of Maryland. The School continues to expand its use of telecommunications and other distance learning technology for off-campus, continuing education,

and international programs. The RN to BSN degree option, post-master's program in informatics, and many individual courses are available online.

Did you know?

The School of Nursing's Museum, located in the building on the second floor, is one of the only museums of its kind in the nation. Through hundreds of original nursing artifacts, historical photographs, letters and documents, and audio and video presentations, the School of Nursing's Living History Museum traces the evolution of the School's mission in nursing education, research, and practice from its early years as a hospital training program to its emergence as a premier professional school.

School of Pharmacy

DEAN

Natalie D. Eddington, PhD

Location: Pharmacy Hall, 730

Phone: 6-7651

ASSOCIATE DEAN FOR STUDENT AFFAIRS

Jill Morgan

Location: Pharmacy Hall, 760

Phone: 6-7653

Founded in 1841, the University of Maryland School of Pharmacy is the fourth oldest school of pharmacy in the nation and the only pharmacy school in Maryland. The School is a thriving center for professional and graduate education, pharmaceutical care, research, and community service. Ranking ninth in the nation, the School strives to improve the health and well-being of society by aiding in the discovery, development and use of medicines. The School's PharmD program expanded to The Universities at Shady Grove in Montgomery County in the fall of 2007, and construction will soon begin on a \$62 million, seven-story building adjacent to the School's Pharmacy Hall.

The University of Maryland School of Pharmacy's mission is to enhance health through innovative pharmaceutical education, research, practice and public service. It is a comprehensive institution, offering not only the Doctor of Pharmacy degree, but also post-PharmD residency and fellowship opportunities, two Doctor of Philosophy programs training independent scientists and health services researchers, and a variety of dual degree programs with business, law, public health, and the pharmaceutical sciences. The School not only prepares future generations of Maryland Brand Pharmacists, it also reaches out to the community every day, and engages in scholarship that will contribute mightily to the health and well-being of society. A wide range of clinical service programs provides excellent pharmaceutical care to patients including community outreach programs that touch

thousands of individuals through the Maryland Poison Center, The Peter Lamy Center on Drug Therapy and Aging, and the Office of Substance Abuse Studies. The School's research program in pharmaceutical health services and pharmaceutical sciences is at the cutting edge of scholarly advances through its Centers, including the Center on Drugs and Public Policy, the Computer Aided Drug Design Center, the Center for Nanomedicine and Cellular Delivery, and Pharmaceutical Research Computer.

Did you know?

The current nationwide pharmacy shortage has yielded a strong demand for School of Pharmacy graduates. Recent graduates received an average of four job offers with starting salaries in pharmacy practice of \$85,000 to \$110,000 per year, the average salary being \$89,000. More than 55 percent of all graduates continue to live and work in Maryland.

ASSISTANT DEAN FOR STUDENT AFFAIRS

Lucia M. Rusty, MSW

Location: School of Social Work, 3E13

Phone: 6-5100

The School of Social Work, established in 1961, is the largest graduate school of social work in the state. The School was born on the verge of the enormous social upheaval of the 1960s, consolidated its programs during the cultural reversals of the 1970s and 1980s, and marked its 40th anniversary in 2001 as one of the nation's largest and best schools.

It was founded to prepare Master of Social Work practitioners for service in Maryland, and to provide an alternative for Marylanders who had historically commuted out-of-state to study for the master's degree. The School was deliberately situated in the shadow of housing projects and vacant lots, in a city whose celebrated renaissance was then but a glimmer. The School is part of an important chapter in Baltimore's remarkable tradition of social service, a tradition matched by only a few American cities.

Faculty are known for their innovative work with child and family welfare, community practice, welfare reform, HIV and AIDS, and other critical issues.

The School offers four dual-degree programs: the MSW/MBA with the University of Maryland, College Park; the MSW/JD with the School of Law; the MSW/MA (Jewish Communal Services) with the Baltimore Hebrew University; and the MSW/MPH with the University of Maryland School of Medicine or the Johns Hopkins University Bloomberg School of Public Health. The School also offers a strong continuing education program.

Did you know?

The School of Social Work provides a half million hours of social work services within Maryland and its surrounding communities.
