Accessing Research Collaborator Agent

To use the Research Collaborator Agent, navigate to <https://www.umaryland.edu/research-chatbot/>

Click on the “Research Collaborator Agent”. See Figure 1.

Figure 1 Accessing Agent

You will be redirected to nebulaONE’s website where you will be prompted to sign in. Click “Sign in with Microsoft” (You will be automatically logged into your account or prompted to input your Microsoft credentials). See Figure 2.

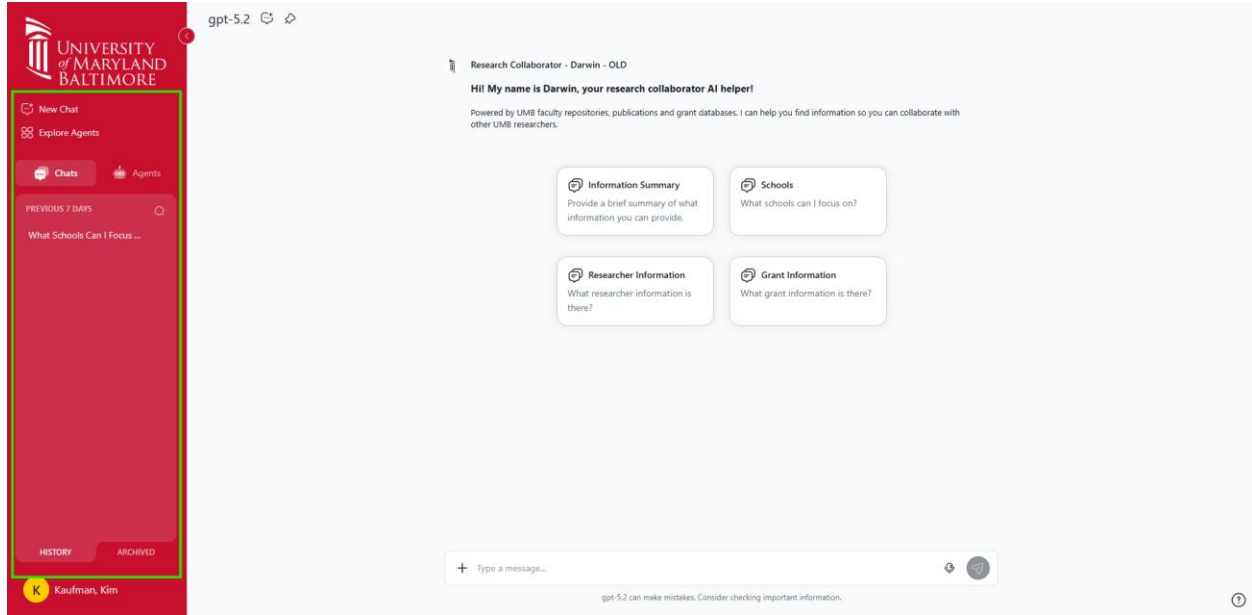

Figure 2 Logging into nebulaONE

Once you have signed in, you will be on nebulaONE’s platform and be able to see the agent and several other features.

On the left side there is a menu bar that includes the ability to start a new chat, explore all agents, revisit historical and/or archived conversations, and revisit recent and/or pinned agents. See Figure 3.

Figure 3 nebulaONE Menu Bar Features

Agent Icon Features

New Conversation

Definition: Starts a brand-new chat session with the agent.

Use when: You want to reset context and start a new topic without the previous chat logs influencing the response.

Pin Agent

Definition: Favorites/pins the current agent configuration to your sidebar or home for quick access.

Use when: You frequently use this agent setup and want it to be available in one click.

Tip: If the agent is on a website browser rather than nebulaONE's platform, the pinning feature may not make an impact.

Export Chat

Definition: Downloads a text file of the conversation you just had in the chat.

Use when: You would like to have a copy of your conversation.

Tip: If you are having issues with the agent, please download the conversation and email it to AIDevelopment@umaryland.edu so it can be reviewed by a developer to help assess the problem.

Quick prompts, chat with file and additional tools

Definition: Opens a panel to shortcut prompts, file-aware chat options, and extra utilities.

Use when: You want to speed up common tasks, upload a document to discuss, or access extended capabilities (e.g., search, formatting)

Quick prompts

Definition: Opens a panel with shortcut prompts, file-aware chat options, and extra utilities.

Use when: You need structure starting point (e.g., “Summarize this,” “Create an outline”)

Speech-to-Text

Definition: Captures your voice and transforms it into text in the input box.

Use when: Typing is unfavorable, or you want to dictate longer queries quickly.

Tip: Check your mic permissions if nothing is captured.

Send Message

Definition: Submit your typed (or recited) message to the agent.

Shortcut: Press **Enter** to send; use **Shift + Enter** for a new line.

Regenerate Answer

Definition: Requests a new response to the most recent prompt without changing your input.

Use when: The answer is incomplete, unclear, or you would like an alternative approach.

Start Playback

Definition: Reads the agent's response aloud using text-to-speech.

Use when: You prefer audio or need accessibility support.

Controls: Play/Pause, volume, and speed (if enabled).

Copy to Clipboard

Definition: Copies the current response so you can paste it elsewhere.

Use when: You want to move content into email, docs, tickets, or reports.

Provide Positive Feedback

Definition: Sends a thumbs-up/positive rating for the response.

Use when: The answer is accurate, helpful, or well-formatted.

Impact: Helps improve future responses and prioritizes successful patterns.

Provide Negative Feedback

Definition: Sends a thumbs-down/negative rating and (optionally) a reason.

Use when: The answer is incorrect, incomplete, off-topic, or poorly formatted.

Tip: Adding comments (what was wrong, what you expected) improves tuning. Feedback is anonymous, so if you would like us to follow up and respond to your feedback, please include your name in the message.

Show Execution Details

Definition: Displays the behind-the-scenes information about the agent's response run (e.g., tools used, steps taken, file references, timing).

Use when: You need transparency for debugging, compliance, or reproducibility.

Chat Starters

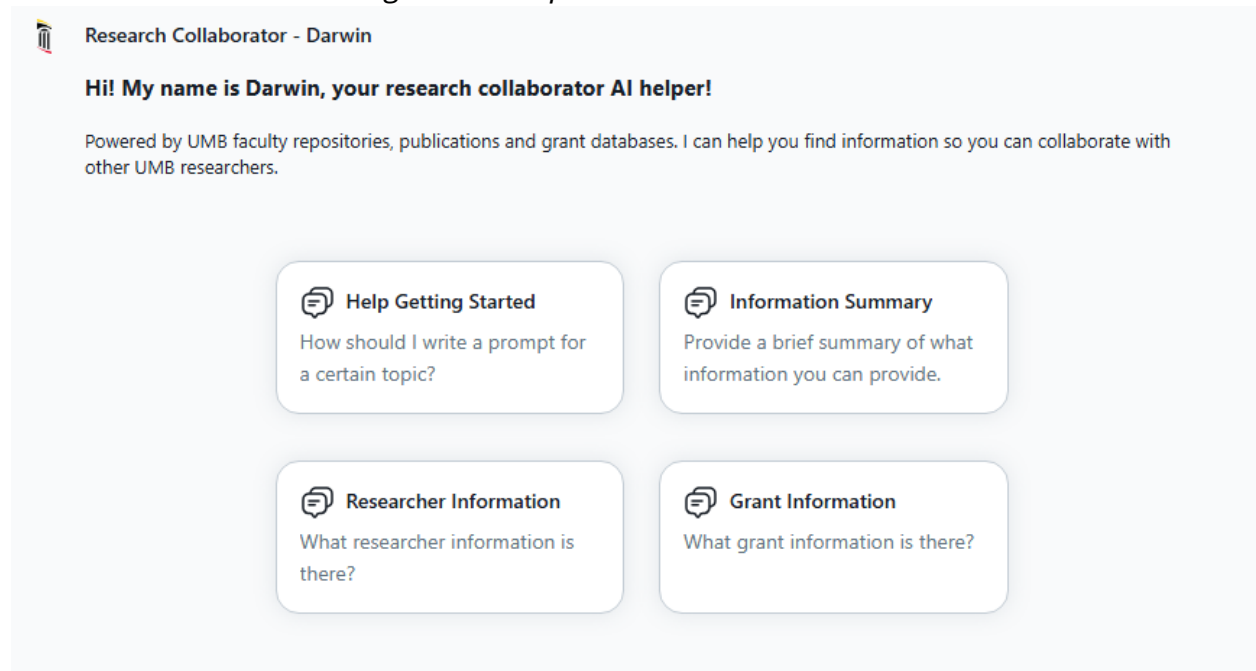

Chat Starters are preset; one-click example prompts that help users quickly begin a conversation with the agent. They are especially useful when you are not sure how to begin or want to see examples.

The Research Collaborator Agent consists of four chat starters:

- How should I write a prompt for a certain topic?
- Provide a brief summary of what information you can provide.
- What researcher information is there?
- What grant information is there?

If you would like to use a Chat Starter, you need to click on the prompt button that contains the question you would like to answer. See Figure 4.

Figure 4 Prompt Button for Chat Starters

After selecting a Chat Starter, you can continue asking more questions. These questions can be your own original questions or other Chat Starter questions. See Figure 5.

Figure 5 Grant Information Chat Starter Selected & Followed Up with Another Question

The screenshot displays a chat interface with four chat starter buttons at the top: 'Help Getting Started' (How should I write a prompt for a certain topic?), 'Information Summary' (Provide a brief summary of what information you can provide.), 'Researcher Information' (What researcher information is there?), and 'Grant Information' (What grant information is there?).

The first interaction shows a user question: 'What grant information is there?'. The response is from 'Research Collaborator - Darwin' and includes the following text and list:

I can help you find **open** and **forecasted** funding opportunities relevant to UMB research, and summarize key details such as:

- **Grant name + link**
- **Status** (Open vs. Forecasted)
- **Funding agency**
- **Award range / expected budget** (when available)
- **Key dates** (estimated post date, application due date)
- **Eligibility / subawards** (when listed)
- **Short summary + how to apply**
- **Agency contact** (when available)

What **topic or research area** are you looking for (e.g., "opioid use disorder," "AI in clinical decision support," "maternal health disparities")?

And do you want to focus on any specific UMB school or center (e.g., **SOM, SON, SOP**), or search across all of UMB?

The second interaction shows a user question: 'What grants are available for Alzheimer?'. The response is from 'Another Agent' and includes the following text and list:

Here are 10 open or forecasted Alzheimer's-related funding opportunities found by GrantedAI, sorted by relevancy to your query.

1. [PAR-25-297: Alzheimer's Drug-Development Program \(U01 Clinical Trial Optional\)](#)

- **Grant Status: Open / No deadline listed (as reported)**
- **Agency: National Institutes of Health (NIH)**
- **Contact: Not specified**
- **Award Range: Varies**
- **Sub-Awards: Not specified**

Examples of Research Collaborator Agent Chat

You can ask the agent different questions about faculty and grants, including who researches specific topics. See Figure 6 for example relating to faculty information. See Figure 7 for example relating to grant information.

Figure 6 Example of Faculty Information on Research Collaboration Agent

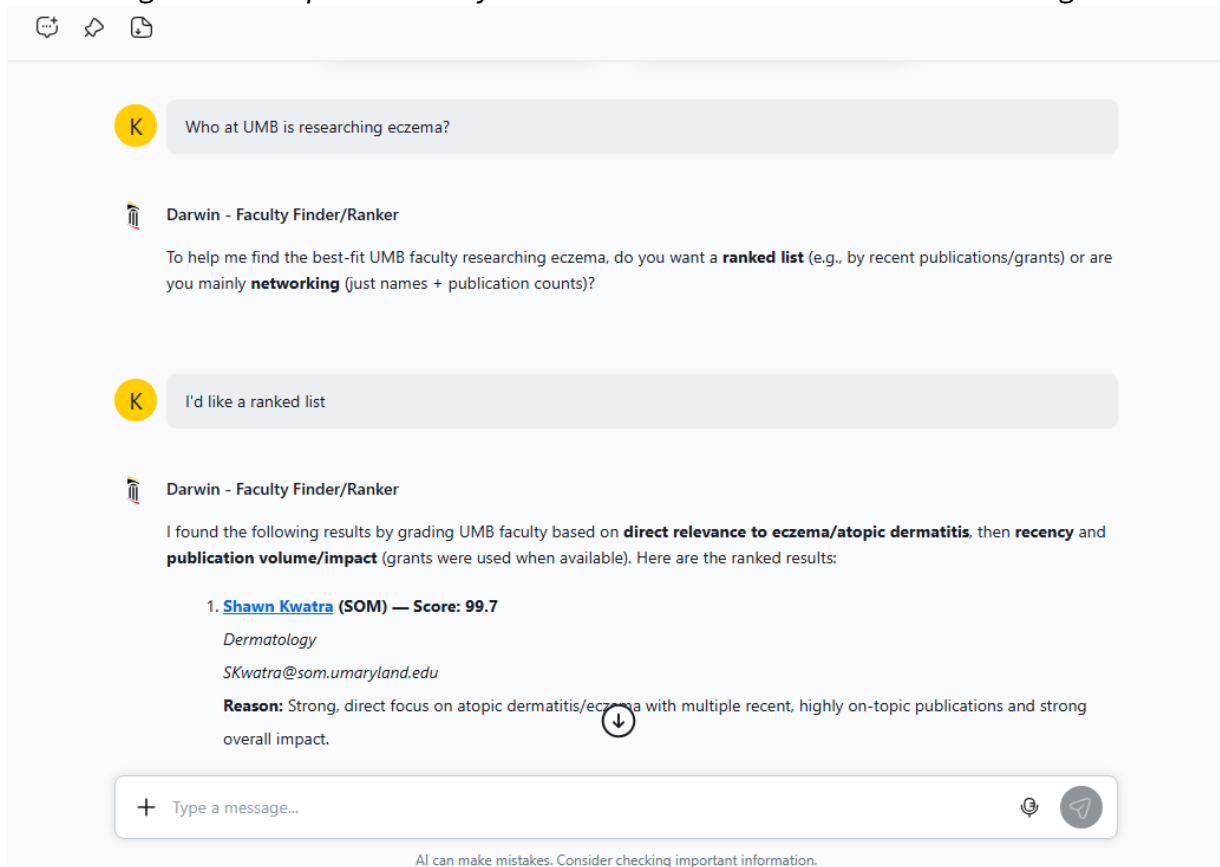

Figure 7 Example of Grant Information on Research Collaboration Agent

The screenshot shows a chat window with a user query and an AI response. The user asks, "What grants are there for Alzheimer?". The AI, identified as "Darwin - Find Open Grants", provides a list of grants. The first result is "Alzheimer's Disease Programs Initiative (ADPI) - States and Community Grants (Winter 2025)". The response includes a list of key details for this grant, such as its status, agency, contact information, award range, and application deadline. A warning at the bottom states, "AI can make mistakes. Consider checking important information."

What grants are there for Alzheimer?

Darwin - Find Open Grants

Here are the open or forecasted grants found for "Alzheimer." The results are sorted by relevancy to the provided topic.

- [1. Alzheimer's Disease Programs Initiative \(ADPI\) - States and Community Grants \(Winter 2025\)](#)

- **Grant Status:** forecasted
- **Agency:** Administration for Community Living
- **Contact:** Erin.Long@acl.hhs.gov
- **Estimated Award Range:** \$850,000 - \$1,000,000
- **Estimated Sub-Awards:** 30
- **Estimated Fiscal Year:** 2025
- **Estimated Post Date:** 2025-03-05
- **Estimated Application Due Date:** 2025-05-05
- **Grant Summary:** Supports development and expansion of dementia-capable home- and community-based service (HCBS) systems via two options (Grants to States; Grants to Communities) to improve services for people with dementia and their caregivers.
- **How to apply:** Follow the ACL grants page linked in [announcement](#) (see additional info URL) and prepare application per NOFO when posted.
