• An overnight stay in a hospital, hospice, or residential medical care facility. • Inpatient care includes any period of incapacity or any subsequent treatment in connection with the overnight stay.
Continuing Treatment by a Health Care Provider (any one or more of the following)
Incapacity Plus Treatment: A period of incapacity of more than three consecutive, full calendar days, and any subsequent treatment or period of incapacity relating to the same condition, that also involves either: ○ Two or more in-person visits to a health care provider for treatment within 30 days of the first day of incapacity unless extenuating circumstances exist. The first visit must be within seven days of the first day of incapacity; or, ○ At least one in-person visit to a health care provider for treatment within seven days of the first day of incapacity, which results in a regimen of continuing treatment under the supervision of the health care provider. For example, the health provider might prescribe a course of prescription medication or therapy requiring special equipment.

Chronic Conditions: Any period of incapacity due to or treatment for a chronic serious health condition, such as diabetes, asthma, migraine headaches.
