“Strengthening Palliative Care in Nursing Homes: Insights from a Community-Engaged Research Partnership”

Presented by

Joan G. Carpenter, PhD, CRNP, ACHPN, FGSA, FPCN, FAAN

Associate Professor

Organizational Systems and Adult Health

University of Maryland School of Nursing |

Associate Director, Community and Collaboration Core

Institute for Clinical & Translational Research (ICTR)

University of Maryland, Baltimore

The UMB ICTR Community Engaged Research (CEnR) Partnership Development Voucher Program supported the development of an academic community partnership to study palliative care in Maryland nursing homes. Beginning in early 2024, the project established a Community Advisory Board and designed and implemented the Palliative Care Knowledge and Practice Survey with staff in five nursing homes. Over 100 staff responses revealed strong interest in palliative care leadership and training and highlighted critical gaps and opportunities for improvement. These findings informed the preparation of a national presentation, a grant application, and a forthcoming manuscript. Our ultimate goal is to improve access to high-quality, person-centered care for individuals living with serious illness.
