Job description for Genetic Counseling Clinical Assistant:

This position would involve assisting a prenatal genetic counselor. The work study student would triage phone calls, sort through patient results, call out results to patients as appropriate and document his/her conversations with the patients. He/she would also complete test requisition forms, call laboratories with specific inquiries and perform literature searches, all under the direction and supervision of a genetic counselor and academic coordinator. The person who fills this position may be asked to participate in other administrative tasks as needed by the team and agreed upon by the work study student.
