

Open Water Safety Checklist

Tips for Families When Visiting Oceans, Lakes and Rivers

- Watch kids when they are in or around water, without being distracted. Keep young children and weak swimmers within arm's reach of an adult. Make sure older children swim with a partner every time.
- □ **Choose a Water Watcher.** When there are several adults present, choose one to be responsible for watching children in or near the water for a certain period of time, such as 15 minutes. After 15 minutes, select another adult to be the Water Watcher.
- ☐ **Teach children how to swim.** Every child is different, so enroll children in swim lessons when they are ready consider their age, development and how often they are around water.
- Make sure kids learn water survival skills. Children should be able to do these five things:
 - 1. Step or jump into water over their head and return to the surface.
 - 2. Turn around in the water and orient to safety.
 - 3. Float or tread water.
 - 4. Combine breathing with forward movement in the water.
 - 5. Fxit the water.

- ☐ Teach children that swimming in open water is different from swimming in a pool. Know the hidden hazards of open water such as limited visibility, sudden drop-offs, uneven surfaces, currents and undertow.
- □ **Use designated swimming areas and recreational areas whenever possible.** Look for posted signs about open water hazards. Also look for signs that say when lifeguards will be present.
- Wear a U.S. Coast Guard-approved life jacket when boating or participating in other water activities. Choose a life jacket that is right for your child's weight and water activity. Weak swimmers and children who cannot swim should wear life jackets when they are in or near water.
- □ **Learn basic water rescue skills and CPR.** It is important to know how to respond in an emergency without putting yourself at risk of drowning.
