

**Executive Summary for  
School of Medicine  
Student COVID-19 Impact Surveys  
(June 2020 & December 2020)**

**Background.** The Provost’s Office of the University of Maryland, Baltimore sought to understand the experiences and broad impact of the COVID-19 pandemic on their faculty, staff, and students during the pandemic, requiring virtual work, teaching, learning, research, and service. This report summarizes school-level responses to two surveys administered during 2020. First, a 41-item survey sent to all students from June 2-14, following the transition to emergency remote learning and virtual teaching/work in March 2020. A second 60-item survey administered from November 20 through December 15, 2020, with the addition of 11 items focused on COVID-19 health and safety behaviors. Some questions were removed (e.g., a few IT questions) and others were added to mirror the faculty survey (e.g., University and School Leadership Response, Satisfaction with Faculty Instruction). In June 2020, questions were combined regarding resources and co-curricular experiences offered by UMB Student Affairs and the Student Affairs Offices in the schools, and separated in December 2020. Survey questions primarily derived from surveys produced by the Higher Education Data Sharing Consortium (2020), EDUCAUSE (2020), and the National Consortium for Building Healthy Academic Communities (2020), and supplemented with institutionally relevant items related to impacts on research, clinical experiences, and didactic learning. Open-ended qualitative questions focused on learning what students believe went well and has not gone well in terms of their experiences as a student, and in December 2020, what has been helpful upon resuming clinical practice or experiential learning. Survey results for the school presented by survey topic area with comparisons to aggregate responses by all UMB students. Response categories were selected to portray significant data comparison points for key questions and do not account for all responses to each question or all questions in the survey.

**Participants:** In June 2020, 17% (192) of the 1,104 respondents were from the School of Medicine. The highest response rate in December 2020 was from SOM: 24% (240) of the 1,018 respondents indicated this was their primary School in Fall 2020; 16% (24) stated they completed the June survey.
